Education

SRM Institute of Science and Technology — Kattankulathur, Chengalpattu dist.
M.tech integrated cse with specialization datascience — *june 2022 – April 2027*

- Cumulative GPA : **8.8/10.0** (till present)

St. Marys Matric. Hr. Sec. School — Chengalpattu Dist.
12th : **79 percent** — April 2021 – April 2022

10th : **70 percent** — April 2019 – April 2020

Experience

DataScience Intern — 05.01.2024 - 05-02-2024
Codesoft — *remote*

- During the Data Science internship at CodSoft, machine learning models were built, data preprocessing was performed, and statistical analysis was conducted using Python. Visualizations were created with Matplotlib and Seaborn, predictive models were optimized, and data-driven strategies were applied to solve real-world problems.

Skills

- **Technical Skills**: MS-Office(Word, Advance Excel, PPT, Teams and One Drive), Python intermediate,java,mern stack, Data Visualization(Powerbi), SQL,mysql,postgresql, Machine Learning, Statistics(Hypothesis Testing), Data science pipeline (collection, cleaning, visualization, modeling, interpretation), Data Analysis, NLP basics,mcp,n8n,rag,llm tuning
- **Soft Skills**: Communication and Interpersonal Skills(Team Collaboration, Presentation Skills, Teaching and Mentorship, demonstrated creativity, Critical thinking, Emotional Intelligence, Adaptability and resilience)

Certificates And Achievements

Internship Certificate: **(link)**
SAP Certificate: **(link)**
NPTEL in ML: **(link)**
AWS Machine Learning Fundamentals: **(link)**
Scalar : **(link)**
Data Visualization using tableau: **(link)**
Big Data analytics Certificate: **(link)**
be10x : **(link)**
forage cybersecurity analyst job simulation: **(link)**
Hackathon Certificates: **(link)**
Oracle Certificates: **(link)**
Coursera Certificates: **(link)**
Anthropic Certificates: **(link)**

Projects

VOICEDOC AI - Talk to Your Files — Jan 2026 – mar 2026
AI / Full Stack Developer

- Designed a **privacy-focused AI system** using **Ollama (offline LLM)** eliminating cloud dependency and ensuring secure local data processing.
- Implemented a **RAG pipeline** using **FAISS** and **SentenceTransformers** for accurate document-based question answering.

- Developed advanced features including **streaming responses**, **speech interface**, and **automated data visualization dashboards**.
- **Tech Stack:** React, Node.js, Ollama, FAISS, SentenceTransformers, Python **Live Demo:** View Project

Real-Time Indian Sign Language AI Translator Jan 2026 – Apr 2026

Full Stack, AI & ML Developer

- Designed a hybrid **GNN + Transformer** model for sign language translation, achieving **95.4% word accuracy** on a 241-word ISL vocabulary.
- Built a real-time system using **FastAPI**, **WebSocket streaming**, and **MediaPipe Holistic** for live inference.
- Implemented **CTC loss** with sequence-to-sequence decoding and optimized training strategy for improved performance.
- Developed a **React (Vite)** frontend with webcam translation, video upload, text-to-sign lookup, and **Text-to-Speech output**.
- **Tech Stack:** Python, JavaScript, PyTorch, FastAPI, React, OpenCV, MediaPipe, WebSockets, NumPy, Pandas, CUDA

Live Demo: View Project

College Admission & E-Commerce Web App Feb 2025 – Apr 2025

Full Stack MERN Developer

- Developed a full-stack MERN web application combining a college admission portal with an integrated e-commerce platform.
- Implemented student registration with email confirmation, MongoDB storage, product catalog, and cash-on-delivery checkout system.
- **Live Demo:** View Project

AI Hand Cricket Game Jul 2025 – Aug 2025

Full Stack Developer (AI + Web)

- Built an interactive web-based cricket game using AI/ML for real-time hand gesture recognition via camera input.
- Implemented AI opponent, gesture detection, scoring logic, and OUT conditions.
- **Live Demo:** View Project

YouTube Sentiment Analyzer (AI/ML) Aug 2025 – Sep 2025

Full Stack AI/ML Developer

- Built a full-stack web app using **React, Node.js, and Python (Flask)** to analyze YouTube comments.
- Implemented NLP-based sentiment analysis using **Transformer model (DistilBERT)** for real-time classification.
- Designed a **microservices architecture** integrating frontend, backend, and ML service via REST APIs.
- **Live Demo:** View Project

House & Vehicle Rental Platform may 2026 – june 2026

Full Stack with AI and LLM

- Developed a full-stack rental marketplace using React.js, Vite, and Supabase, implementing authentication, role-based dashboards, rental listing search, CRUD operations, and booking management with PostgreSQL and Row Level Security (RLS).
- Integrated a Groq-powered AI chatbot using Supabase Edge Functions and configured GitHub version control and Render deployment for production hosting.
- Tech Stack: React.js, JavaScript, Vite, Supabase, PostgreSQL, Groq API, REST APIs, Git, GitHub, Render, CSS
- **GitHub:** View Project

AI Fitness Tracking & Diet Management Web App Feb 2025 – Apr 2025

Full Stack Developer

- Built a fitness tracking web app with AI chatbot for diet and workout guidance.
- Implemented calorie tracking, workout monitoring, and personalized diet planning.
- **GitHub:** Repository Link
